

The latest release of our [Amazon Web Services content plugin](#) for Joomla 1.5, 1.6 and 1.7, and for Mighty Extensions Resources, is version 2.4.2. This content plugin allows you to embed product information and reviews and links from Amazon Web Services into your Joomla articles.

This release includes several improvements:-

- It adds support for Joomla 1.7
- It adds support for the latest version of the Amazon product advertising API (2011-08-01)
- It adds support for the new Italian and Chinese Amazon product advertising APIs (see <https://forums.aws.amazon.com/ann.jspa?annID=1115>)

Existing customers who have purchased the plugin in the past year can now download and install the new version using their current download links.
