Carousel Module version 2
Sunday, 19 April 2009 16:50 - Last Updated Sunday, 19 April 2009 16:59

We have now released version two of the featured items carousel module. This includes two new features: it can be used with Joomsuite resources as well as the Joomla! content components; and special tags can be used to add additional information about an article for display in the module.

These features are described more fully in the documentation .

Mod featured items carousel is a module extension for the the Joomla 1.5 CMS. It displays a short excerpt from articles in a selected category or section, or from a specified list of articles, with link and optional thumbnail image. The items are displayed as a carousel.
