

We have a new release of our popular extension for Joomla and Virtuemart, GooglebaseXML.

This extension allows you to create an XML product feed for your Virtuemart store for upload to [Google Merchant Centre](#)

. The latest release, version 3.0.0, for the first time is compatible with Virtuemart 2 and Joomla 2.5 as well as 1.5.

We also have an updated release for Virtuemart 1.1x and Joomla 1.5, version 2.1.0. This includes some minor changes to update the feed to the latest Google feed specification.

The extension includes many features designed to give you an accurate and informative product feed that closely matches the Google feed specs. These include:-

- Product variant display
- Support for additional product attributes such as size, color etc
- Support for the Google Category attribute
- Additional countries, those supported are now: United States, United Kingdom, Germany, France, Japan, the Netherlands, Spain, Italy, China, Australia, Brazil, Switzerland and the Czech Republic
- Support for sale_price, and sale price effective date attributes
- Additional product images
- Feed can use Virtuemart product type data fields

For the first time both releases allow you to choose whether or not to display prices including tax by passing this as an URL parameter - useful if you want feeds for both the US and European countries.
